 **ACUFINE**
LIFESCIENCES PVT. LTD.

ABOUT US

Acufine Lifesciences, a part of Indiana Group, entered the Indian crop protection and pest management solutions market in the year 2021. With our innovative grassroots approach, and strong sales & marketing network, we are today one of the leading contenders for the top spot in the agro-chemical space in India.

Since our inception we have been working with farmers on one-on-one basis. This has helped us understand their problems and needs more closely. Based on our interaction we have formulated a wide range of 50+ herbicides, insecticides and fungicides, which also include certain tailor-made products specifically intended for the Indian agricultural landscape.

In our products, our customers find comprehensive crop protection and pest management solutions which are manufactured in our state-of-the-art manufacturing plant in Ludhiana, Punjab. World-class technology is assembled and put into place to ensure highest quality standards required to safeguard crops and give maximum yield to the farmers.

Going further, Acufine Lifesciences envisions to be the leader in its business by widening its product range, and offering farmers varied solutions in crop protection thus ensuring higher quantum of harvest, and better return for their produce.

WHY CHOOSE ACUFINE?

Advanced Research & Development

Pioneering innovative solutions for evolving agricultural challenges.

Sustainable & Eco-friendly Innovations

Committed to reducing environmental impact while improving efficiency.

Farmer-Centric Approach

Developing products that empower farmers with better yields and profitability.

Uncompromised Quality

Manufacturing under stringent quality controls for superior product efficacy.

Efficient Supply Chain & Fast Delivery

Ensuring timely delivery and seamless distribution across India to meet urgent agricultural needs.

OUR CORPORATE FABRIC...

MISSION

To continuously develop and diversify ourselves to meet the everchanging customer needs and aspirations. We will be guided and be inspired to remain committed to innovation and customer satisfaction, thereby fostering customer confidence and loyalty in our brands.

VISION

To be the leader in the agro-chemical space with emphasis on excellence in innovation, sustainability and safety. We envision to go global with our products by following best manufacturing practices and remaining customer-centric thereby ensuring growth and profitability.

VALUES

To conduct business with highest integrity, honesty and transparency, thus cultivating a bond of faith and trust with our customers, partners and stakeholders alike. We would invest in product development, employee empowerment and promotion of ethical business practices.

PROMISE

We promise highest efficacy, quality, safety, and reliability of our products and brands. We assure that we would meet and comply with all regulatory obligations, be environmentally responsible, and provide 360-degree customer support including guidance on product usage.

OUR SOLUTIONS

HERBICIDES

Herbicides are chemical or biological agents used to eliminate unwanted vegetation commonly known as weeds. They play significant role in agriculture, landscaping, and weed management.

FUNGICIDES

Fungicides are chemical or biological agents used to control, and eradicate fungal diseases in plants. They play crucial role in protecting crops from fungal diseases.

INSECTICIDES

Insecticides are chemical or biological substances used to control and eliminate insects that harm the crops. They are important component of pest management in agriculture.

OUR SERVICES

At Acufine Lifesciences, we specialize in B2B and P2P partnerships, delivering high-performance crop protection solutions to agro-dealers, distributors, and agribusinesses. Our services ensure efficiency, reliability, and sustainability, helping you grow your business with confidence.

Tailored Crop Protection Solutions

Custom-formulated pesticides designed for large-scale farms, distributors, and agro-businesses, ensuring maximum effectiveness for different crops and pest challenges.

Private Label & Bulk Supply

Expand your brand with custom packaging, white-label solutions, and flexible bulk supply options, giving you a competitive edge in the market

Fast & Reliable Supply Chain

With an optimized logistics network, we guarantee on-time deliveries and seamless product availability, preventing stock shortages and ensuring smooth operations

Sustainable & Eco-Friendly Products

We offer biodegradable and low-toxicity pesticides, meeting global sustainability standards while ensuring powerful pest control with minimal environmental impact.

BEING AN ACUFINEITE...

CAREER

A career in an agrochemical company opens wide range of opportunities in various fields relating to agriculture and crop protection. E.g., research & development, quality control and assurance, field agronomy and crop consultation, government relations and advocacy, biotechnology, and genomics, etc. Education and training in agronomy, chemistry, environmental science, business or engineering is beneficial to excel in your career. Acufine Lifesciences provides you with an ideal platform to learn and grow as a professional in agrochemical. Innovation, collaboration, diverse workforce, and inclusive environment form the basis and define our work culture. You are welcome to join us, and evolve with us, as we pursue our goal to better the lives of farmers and work towards betterment of human health.
